# Roman Osborne

Programmer & Digital Creator

I'm a new graduate from London Design & Engineering UTC. As someone who has worked hard to even get accepted in to the respected University Technical College, it should come without surprise that I am a disciplined and hard-working person. With impressive grades and a strong educational background, I present myself as the best candidate with action, not words. Impressive results and a detailed profile truly shows my commitment to making things happen.

## Skills

- Programming (Java, C#, Lua, HTML, CSS, JavaScript)
- Animation, Video and Audio Editing
- 3D Modelling and Game Development
- Microsoft Word / Excel / Powerpoint
- Pitching Products / Public Speaking
- Database Management
- Managing Computer Hardware (built computers and changed parts)

## Languages

English - Native

Russian - Intermediate

Ukrainian - Intermediate

## Projects

AmnesicChat - A privacy focused chat service built on Java.

The New Galaxy - A website built on the inspiration of Star Wars

Capture The Poly - A simple FPS game where its theme is based on Capture The Flag.

Unique Droid - From 3D Modelling software, I have crafted a unique droid with interesting characteristics

## Work Experience

### 26 - 30 June 2022 - Skanska

I was assigned for a 4 day work experience at Skanska in line with AHMM, an architecture company. I was taught to use various software like Sketchup & Revit. They are all softwares which can be used in designing for construction.

### 8 - 19 July 2024 - Regefield UK Limited

During my 10 days of working with Regefield, I have worked on spreadsheet documents, translating documents for clients and managed finances through different accounts. The level of trust given to me to manage administrative parts of the business reflects on how dilligent I am. Managing finances worth a lot of money is not easy to encounter because people will not easily trust a company to handle worth millions of dollars.

### 27 July - 18 August 2024 - Atlantic Pacific

This was my first paid placement as a Lifeguard working with Atlantic Pacific. Working as a lifeguard is no easy task. It requires focus and discipline which is what I have always been building throughout my life. Getting accepted in to the job really meant that my discipline was genuine. It demonstrated how concentrated and focused I am at my job considering I had to observe for long periods of time.

## Education

### London Desgin & Engineering UTC [ 2023 - 2025 ]

A University Technical College, renowned for its impressive results from technical subjects like Engineering, Aviation & Digital Media. Located in East London.
